

Riello UPS and Ducati together to win on the track and in international markets

More than ten-year relationship between the two Italian technological excellences renewed for the 2023 MotoGP and Superbike season

Legnago, 31 January 2023. Riello UPS, a brand of the Riello Elettronica group, world player in the production of uninterruptible power supplies, photovoltaic inverters and Energy Storage systems, announces the renewal of the sponsorship of the Ducati Lenovo Team for the MotoGP World Championship and of the Team Aruba.it Racing – Ducati for the 2023 Superbike championship.

Following the successes achieved in 2022 with victory in the World Championship for Riders, Manufacturers and Teams in MotoGP and Riders', Manufacturers' and Teams' Championship in Superbike, Riello UPS once again wishes to confirm, for this season, the visibility of its logo on the most famous bikes in the world, on the riders' leathers (Francesco Bagnaia and Enea Bastianini in MotoGP, and Alvaro Bautista and Michael Rinaldi in WorldSBK) and on the team clothing.

The two Italian companies are ready to replicate and even improve their results in the fields of racing and work on their respective international markets. Carrying on with a path of continuous technological research that has led them to be two global players who are champions of Made in Italy and successfully export their excellence all over the world, Riello UPS and Ducati will continue a now tested synergy based on a great ability to work as a team, to evolve and improve year after year.

Ducati will once again be supported by Riello UPS technology, which helps to maintain high performance with its uninterruptible power supplies, placed to protect the fundamental electronic control and communication equipment of the two teams. Riello UPS solutions are also used to ensure the maximum security and reliability of the Ducati company IT and production systems.

The technical partnership is the result of a common vision aimed at reducing energy consumption: the highly efficient and reliable uninterruptible power supplies that Riello UPS supplies to the two teams are in fact designed with cutting-edge technologies and components, capable of reducing and eliminating energy loss by choosing the operating mode based on the load variation, thus ensuring a reduction in CO2 emissions.

“2022 was a year in which, together with Ducati, we achieved the greatest successes on tracks all over the world and in parallel also on the international benchmark markets for our company,” said Fabio Passuello, CEO of Riello UPS. “In our DNA there is the desire to always do better, to set ever more ambitious goals especially in the field of reducing

energy consumption and to achieve them with teamwork and continuous investment in research and development of innovative and green solutions. This is why we will not be satisfied and will also try to repeat and improve these results in 2023, continuing together with Ducati to represent the excellence of Made in Italy in the world," concludes Fabio Passuello.

"Once again it is a great pleasure for me to announce the renewal of Ducati's agreement with Riello UPS, our partner for many years in MotoGP and Superbike," said Ducati Corse General Manager Luigi Dall'Igna. "We are delighted that we were able to celebrate an incredible season with them last year and are sure that, with their continued support, the future can look bright too. Both our companies stand out for having the same research and technological development goals, continuous synergies and the pursuit of success in their respective fields. We will continue to work closely together to achieve continued success."

"The partnership with Riello UPS is a strategic one that crosses the boundaries of the circuits and reaches inside our data centres where we collaborate to achieve our objectives of environmental sustainability, maximum reliability and reduction of energy consumption," commented Stefano Cecconi, Aruba.it CEO and Aruba.it Racing – Ducati Team Principal. "For this reason, we are extremely happy to be able to count on Riello UPS products again next season, with whom we have shared, together with Ducati, the joys of an extraordinary 2022 in WorldSBK and MotoGP. The goals achieved certainly do not represent a point of arrival for us but an incentive to work even more with greater passion and dedication to defend the titles we have conquered".

Information about Riello UPS

Riello UPS is the brand of uninterruptible power supplies for Data Centres, electromedical applications, security and emergency equipment, industrial processes, and communication systems, designed and produced by RPS S.p.A., a company based in Italy and part of the Riello Elettronica Group. Information about Ducati

Ducati Motor Holding S.p.A. - A Sole Shareholder Company - A Company subject to the Management and Coordination activities of AUDI AG

Founded in 1926, since 1946 Ducati has been manufacturing sport-inspired motorcycles characterised by high-performance engines, innovative design and cutting-edge technology. The Ducati factory is located in Bologna's Borgo Panigale district. The model range covers several market segments with the following families: DesertX, Diavel, XDiavel, Hypermotard, Monster, Multistrada, Panigale, Streetfighter and SuperSport. In 2015, Ducati presented the Ducati Scrambler: a new brand made of bikes, accessories and apparel that stands out for its creativity and self-expression. In 2020, Ducati unveiled the Multistrada V4, the world's first motorcycle equipped with front and rear radar, which with its technology marks a new milestone for the world of two wheels. Ducati's iconic motorcycles, together with an extensive range of bike accessories and technical and lifestyle apparel, are distributed in 90 countries worldwide. In 2021, Ducati delivered 61,562 bikes to customers. Ducati competes with official

teams in the MotoGP World Championship and Superbike World Championship. In MotoGP, where the Company has been racing since 2003, Ducati won the Constructors' title in 2007, 2020, 2021 and 2022, the Teams' title in 2007, 2021 and 2022 and the Rider's title in 2007 and 2022, becoming two times World Champion. In Superbike, Ducati has won 18 Constructors' titles and 15 Riders' titles, confirming its position as the most successful manufacturer in the category. 2022 marked an unprecedented year for Ducati: for the first time in its history, the Company won the Triple Crown in both the MotoGP and Superbike World Championships. From 2023 until 2026, the motorcycle manufacturer will be the sole official supplier of motorbikes for the FIM Enel MotoE™ World Cup, the electric class of the MotoGP World Championship.

Informazioni su Aruba

Aruba SpA, founded in 1994, is the leading Italian cloud provider and the first company in Italy for data center, cloud, hosting, trust services, e-mail, PEC and domain registration services, aimed at individuals, professionals, businesses and the public. Aruba manages 2.6 million registered domains, 9.4 million e-mail accounts, 8 million certified e-mail accounts, 130,000 managed servers, for a total of 16 million users. Aruba PEC and Actalis are the 2 Aruba Certification Authorities, both accredited by AgID (Agency for Digital Italy), providing highly qualified services. In March 2021, Aruba enters the Telco market with the offer of ultra-broadband connectivity services in Italy, based on Open Fiber's full fiber optic network (FTTH - Fiber To The Home). In almost 30 years the company has acquired a long experience in the development and management of high-tech data centers, owned and located on the national territory (the largest is in Ponte San Pietro - BG), characterized by 'green by design' infrastructures and systems compliant with the highest safety standards in the sector (Rating 4 ANSI / TIA-942) and designed to have the minimum environmental impact. Since 2011, the company has fully satisfied its overall needs with energy from 100% renewable sources and also produces its own energy through photovoltaic systems, geothermal systems and hydroelectric plants, all of which are owned. The infrastructure network also extends to Europe with a proprietary Data Center in the Czech Republic and partner facilities located in France, Germany, Poland and the UK. Since 2014 Aruba has been the official registry of the authoritative '.cloud' extension for the worldwide registration of Internet domains. Aruba.it Racing has been an official Ducati team in the Superbike World Championship since 2015. For more information on the Aruba Group, visit the website: <https://www.aruba.it>
